Maya Okafor

Software Engineering Student · maya.okafor@example.com · Pune, India · mayaokafor.dev

EXPERIENCE

Software Engineering Intern, Ledgerline (payments startup) — May 2025 to Aug 2025

• Built the refund service in Go and PostgreSQL; it now handles 40k refunds a month with p99 latency of 120 ms.

• Cut CI time from 19 to 7 minutes by caching Docker layers and splitting the test suite.

Teaching Assistant, Data Structures — Jan 2025 to Apr 2025

• Ran weekly labs for 60 students and wrote 12 autograded problem sets.

PROJECTS

Tallyboard — real-time expense splitting app (Next.js, tRPC, Postgres). 2,300 monthly active users.

• Designed the debt-simplification algorithm that settles a group in at most n-1 payments.

Open source: 9 merged pull requests to the Vitest test runner, including a fix for flaky snapshot diffs.

RAG study assistant — LLM agent over course notes with evals; answer accuracy rose from 61% to 84%.

EDUCATION

B.Tech Computer Science, Expected 2026 — GPA 8.9/10

SKILLS

Go, TypeScript, Python, PostgreSQL, Redis, Docker, GitHub Actions, React, LLM APIs
